ARIELA ISRAEL

HEALTH SERVICES MANAGEMENT STUDENT | HEALTH EQUITY FOR BLACK WOMEN | ASPIRING CLINICAL & BIOMEDICAL INFORMATICIST
Washington, DC | 202.230.0258 | thearielaisrael@gmail.com | linkedin.com/in/ariela-israel | thearielaisrael.com

SUMMARY

Health Services Management undergraduate student and former full-stack software developer building toward a research-oriented career in clinical and biomedical informatics. Established professional foundation in production applications, structured data, relational databases, APIs, accessibility, technical documentation, quality assurance, troubleshooting, and operational workflows. Developing knowledge across health information management, healthcare data, research methods, statistics, and responsible data interpretation, with a long-term focus on health equity for Black women.

TECHNICAL & PROFESSIONAL SKILLS

Data & Information Systems: SQL • PostgreSQL • Structured Data • Relational Data Modeling • Data Validation • Data Quality • Database Systems • Data Workflows • Information Organization

Software & Technology: TypeScript • JavaScript • React • Next.js • Node.js • Express.js • REST APIs • GraphQL APIs • Git • Digital Accessibility

Systems & Operations: Requirements Gathering • Workflow Analysis • Quality Assurance • Testing • Troubleshooting • Technical Documentation • Deployment • Production Application Support

Professional Strengths: Stakeholder Communication • Cross-Functional Collaboration • Technical Communication • Customer Support • Requirements Translation

Developing Healthcare & Research Foundation: Health Services Management • Health Information Management • Healthcare Data Concepts • Research Methods • Statistics • Scientific Literature Evaluation • Evidence Synthesis • Python • R

EDUCATION

University of Maryland Global Campus (UMGC) — Adelphi, MD

Bachelor of Science in Health Services Management | August 2026 - December 2029

GPA: 4.00/4.00

Undergraduate Certificates in Progress: Health Information Management & Data Analytics; Data Analytics

Thinkful — Remote

Certificate, Computer Software Engineering | June 2023 - January 2024

Software engineering program focused on full-stack web application development, databases, REST APIs, testing, and deployment.

PROFESSIONAL EXPERIENCE

Walton Arts Center and Walmart AMP — Remote

Full-Stack Developer | Contract | August 2024 – July 2025

- Served as the sole full-stack developer responsible for designing, building, maintaining, and improving production web applications supporting staff and public audiences.
- Built and maintained database-supported features, structured-data workflows, backend services, APIs, and third-party integrations using PostgreSQL, SQL, Node.js, TypeScript, REST, GraphQL, and related technologies.
- Queried and validated application and database records to troubleshoot issues, identify root causes, maintain data accuracy, and support reliable system behavior.
- Implemented Queue-it virtual waiting-room infrastructure to support fair access and system stability during high-demand ticketing periods.
- Improved usability and accessibility by refining interfaces around observed user needs, operational requirements, and established accessibility practices.
- Performed quality assurance, functional testing, debugging, deployment validation, monitoring, troubleshooting, and post-launch support across production applications.
- Maintained technical documentation and collaborated with technical and nontechnical stakeholders to clarify requirements, communicate system behavior, and support operational workflows.

AJSI Creative — Washington, DC

Independent Designer & Full-Stack Developer | May 2021 – August 2024

- Designed and developed custom websites and web applications for small-business and mission-driven clients.
- Built responsive, accessible interfaces for desktop and mobile experiences.
- Developed backend services, APIs, database-supported functionality, and data workflows supporting content, forms, integrations, and client operations.

- Conducted discovery, requirements gathering, iterative design, and technical planning with nontechnical stakeholders.
- Managed testing, debugging, deployment, maintenance, and post-launch improvements supporting stable production use.
- Translated client goals into maintainable digital systems while balancing design, usability, operational needs, and technical requirements.

Enterprise Holdings — Arlington, VA
Driver | February 2023 – August 2024

- Operated within a time-critical, logistics-driven environment while ensuring the safe and reliable transport of assets.
- Followed schedules, safety requirements, operational procedures, and quality standards across multiple locations.
- Supported workflow consistency through dependable communication, accurate coordination, punctuality, and attention to detail.

MarketSource / Target Mobile — Washington, DC
Retail Sales Representative | August 2020 – July 2021

- Delivered product presentations and customer education supporting stronger engagement and informed purchasing decisions.
- Provided technical troubleshooting and issue resolution for mobile devices, services, and account-related concerns.
- Maintained accurate customer information while following established sales, service, and operational procedures.
- Balanced customer support, product knowledge, technical problem-solving, and performance expectations in a high-volume retail environment.

CVS Pharmacy — Washington, DC
Retail Sales Associate | October 2018 – August 2020

- Assisted customers with product selection, insurance-linked programs, and general product education in a pharmacy and health-retail environment.
- Maintained accurate information and followed established procedures supporting safe and consistent retail operations.
- Supported customer service, inventory organization, transaction accuracy, and day-to-day store workflows.

DEVELOPING PROFESSIONAL DIRECTION

Building upon an established software and systems foundation through undergraduate study in Health Services Management, Health Information Management & Data Analytics, and Data Analytics.

Developing knowledge across health information, healthcare data quality, research methods, statistics, scientific literature evaluation, clinical and biomedical informatics, longitudinal health information, and health equity for Black women.

Current professional interests include health information, healthcare data quality, clinical or research data support, health IT, healthcare operations, quality improvement support, and related roles.
