

ARIELA ISRAEL

HEALTH SERVICES MANAGEMENT STUDENT | HEALTH INFORMATION & DATA

Washington, DC | 202.230.0258 | thearielaisrael@gmail.com | linkedin.com/in/ariela-israel | thearielaisrael.com

PROFESSIONAL SUMMARY

Health Services Management student pursuing certificates in Health Information Management & Data Analytics and Data Analytics, with an established professional background in full-stack software development. Experience supporting production systems, structured data, databases, documentation, quality assurance, accessibility, troubleshooting, and operational workflows. Developing healthcare-domain knowledge across health information, healthcare data, research, and informatics, with a long-term direction toward women's health equity advocacy and informatics.

CORE SKILLS

Information and Data: Structured Data, Data Quality, Data Validation, SQL, PostgreSQL, Database Systems, Data Workflows

Documentation and Operations: Documentation, Quality Assurance, Workflow Analysis, Requirements Gathering, Process Improvement, Testing, Troubleshooting, Operational Support

Technology: TypeScript, JavaScript, React, Next.js, Node.js, Express, APIs, Git, Digital Accessibility

Professional Strengths: Attention to Detail, Organization, Problem-Solving, Written Communication, Stakeholder Communication, Independent Work

EDUCATION

Bachelor of Science, Health Services Management | University of Maryland Global Campus | In Progress | 2026–2029

Certificates in Progress: Health Information Management & Data Analytics; Data Analytics

Certificate, Computer Software Engineering | Thinkful | June 2023–January 2024

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Walton Arts Center and Walmart AMP | Remote | August 2024–July 2025

- Served as the sole full-stack developer responsible for production applications used by staff and public audiences across ticketing, events, and operational workflows.
- Owned work across planning, implementation, testing, debugging, deployment, maintenance, documentation, monitoring, and continuous improvement.
- Built and maintained database-supported application features, APIs, structured data workflows, and accessible user interfaces.
- Translated operational requirements into reliable technical solutions and investigated inconsistencies affecting system usability and performance.

Designer and Full-Stack Developer | AJSI Creative | Washington, DC | November 2023–August 2024

- Designed and developed responsive websites and applications for small-business and mission-driven clients, balancing technical implementation with usability and operational needs.
- Built backend services, APIs, database-supported features, and structured data workflows supporting content, forms, integrations, and client operations.
- Gathered requirements, translated nontechnical stakeholder needs into maintainable solutions, and managed testing, debugging, deployment, and post-launch improvements.

APPLIED STUDY AND DEVELOPING HEALTHCARE KNOWLEDGE

Independent Study and Applied Health-Tech Projects | Self-Directed | January 2026–Present

- Study health information, healthcare data, digital health, informatics, research practices, patient education, and women's whole-body health equity alongside formal coursework.
- Develop educational health-technology and data-quality concepts using synthetic or publicly available information rather than protected patient information.
- Explore racial disparities, delayed diagnosis, fragmented information, longitudinal health records, and the potential role of informatics in more precise and equitable care.
- Document developing academic knowledge, research questions, and technical reflections through The Informatics Diary.

ADDITIONAL EXPERIENCE

Driver | Enterprise Mobility | Arlington, VA | February 2023–August 2024

- Supported time-sensitive daily operations requiring procedural consistency, reliable communication, accurate coordination, and attention to detail.
- Contributed to a 98% customer-satisfaction rating through dependable and courteous service.

Retail Sales Representative | MarketSource Inc. | Washington, DC | August 2020–July 2021

- Assisted customers with technology products, account needs, and technical troubleshooting while communicating complex information clearly.
- Resolved 96% of technical issues, increased customer engagement by 15%, and generated 30% more sales than the team average.

Retail Sales Associate | CVS Pharmacy | Washington, DC | October 2018–August 2020

- Supported customers in a fast-paced health-retail environment requiring accuracy, organization, discretion, and adherence to established procedures.
- Processed transactions, maintained records, resolved customer concerns, and supported consistent daily store operations.
